Moon Myths.

In southern seas sailors, warn intrepid "land labbers," who persist in sleeping in open air, to always woo the dreamy god under an awning; otherwise what might have been a refreshing sleep may ermin or in temporary loss of sight. I av "ter corary" for the reason that it has nover turned out to be a permanent calamity, although it frequently causes much trouble, and gives the victim a scare he remembers the remainder of tested

In regard to the way the moon affects the weather many curious facts are recorded. It is an old saying that "one Saturday moon change is enough for seven years." The nearer the time of the moon's change to midnight, says an old saw, the fairer will the weather be the seven days following.

The nearer to midday the phases of the moon happen the more foul the weather may be expected. The space for these calculations, according to the "weather wise," to two hours before and two hours after midnight and noon. If the new moon stands on its point, "so that the strap of a powder horn would not catch on its 'horn,' 'there will be much wet weather. If the new moon lies flat on its back" it will hold all dampness and a dry spell may be expected. Farmers always plant those vegetables whose roots are used as food in the decline or Louis Republic.

A Famous Institution. A correspondent of the Fairfield (Me.)

lournal writes as follows, from Buffalo, "Editor of Journal:-Thinking that

it might interest some of your readers and make good my promise to you at the same time, I will write a few lines concerning the famous World's Dispensary and Inva-lid's Hotef and Surgical Institute. Let me first disclaim my selfish motive, or desire to advertise or puff this or any in-dustry. Thousands of dollars are ex-pended ever month to keep the merits of this Institution before the world and its

NO FREE ADVERTISEMENTS.

A healthier or more convenient city for those afflicted could not have been selected in which to place such an institu-tion than Buffalo, N. Y. But concerning the city and its attractions I will write in some future letter. The World's Dispensary Medical Association occupies two large and magnificent buildings upon Main and Washington Streets, and a tranch Dispensary at No. 3 New Oxford Street, London England. The Invalids' on West William street in honor of Miss Hotel and Surgical Institute fronts Main Laura Paxton, of Kansas City, Ill. Dane-Street and is attractive and elegant both inside and outside. Although it is FILLED WITH PATIENTS

from all over the country, it is clean and neat as any parlor and is appropriately termed the Invalids' Hotel and Surgical Institute. Large well lighted rooms, with elegant appointments make the sick feel at home rather than at a hospital. Parlors with fine hibraries and musical instruments are accessible to those who are convalescent. A staff of eighteen

SKILLFUL PHYSICIANS AND SURGEONS administer to the sick. A splendid medical library comprising all of the standard works of reference, is in a convenient room for consultation by any of the phy-sicians. Any medical book of note or value is added to this magnificent collection of books as soon as published. The collection of surgical instruments is large and comprises every instrument of real utility and value known to the profession. A system of mechanical movements, pas-sive exercises, manipulations, kneadings and rubbings, administered by a large variety of ingeniously contrived ma-chinery, driven by steam is used as aidclimery, driven by steam is used as adding other medical and surgical treatment in palsy, stiffened joints, crooked and withered limbs and in those chronic cases so often given up by the common busy practitioner of medicine as incurable. Baths of all kinds are made use of in those cases where they are indicated. There is nothing quackish about the institution. It is cur.

TREE FROM ALL HUMBUG or deceit. A large and well appointed drug room in the basement of the Hotel contains all of the medicines and chemicals used by physicians and is in charge of authorized and skilled pharmacists and apothecaries. Each case is prescribed for according to the same rules and laws which govern any intelligent doctor when writing a prescription for his patient. There is no restriction used with the physicians in the Institution and they have the whote domain of materia medica to choose from. The proprietary medicines are only used or advised when in the judgment of the physician (to whom the formulas are known) they are indicated. Many and in fact every physician of any experience has found some remedies or combination of drugs to do good work in a certain class of cases. Hence he writes the same prescription over and over again till the druggist knows it by heart and smiles when he locks at it. But it is none the less valuable for all that and the phy sician who knows its value does not feel condemned for writing it, and would feel hurt and stould defend it if he should be criticised for its frequent repetition. The doctor writing said prescription does not pretend that it will care everything or that it applies to every case. Upon this principle Dr. Pierce has (with much greater experience than ordinary physicians) devised, compounded and thoroughly

A FEW PRESCRIPTIONS

of remedies which in certain cases are curative and stand the test of time. They are not patent medicines not are they mended to cure every disease that flesh is hear to. They are favorite prescriptions advised in those cases where they applicable. Those medicine men who cry 'fraud' and 'quack' should re-member that one man has as much right to his favorite remedies as another. Neitha it any more disgrace for a man to advertise and FAY FOR IT LIKE A MAN

than it is for a physician to get some one to write an item for the paper telling about his skill in performing a surgical operation. I have seen an old physician who was a stickler as regards medical codes and professional etiquette, stop the editor of his local paper on the street and tell him how ill ex-Gov. X. was and he had just given him a pill or put a plaster on his back. The doctor knew the news-paper would contain the news of his being called to see the ex-governor in its next issue. But nevertheless he shudders when he sees a legitimate advertise-ment which has been paid for. The people of this country are familiar with the portrait of R. V. Pierce, M. D. The Doctor would be readily recognized by any one who has seen his portrait. His head is large and well orbed, and ability and enterprise are stamped upon his fea-tures and movements. Starting without fame or fortune he is to-day the wides known medical man of the age. The fact that he resigned his seat in Congress to attend to his vast business speaks londer than words of his interest and devotion than words of his interest and devotion to his profession. Patients from the most distant states arrive daily for treatment at the Invalids' Hotel and Surgical In-stitute. The World's Dispensary, which stitute. The World's Dispen fronts Washington Street, is A GREAT HIVE OF INDUSTRY.

Here the proprietary medicines are put up and the printing and binding done. Fourteen large presses, driven by power, stop and start shuttle, nerve shaker I now have. The S'andard shuttle makes a stitch for every revolution; loop from meable massing entirely over shuttle and specified over 330,000 copies of which have been sold. Everybody in Mane is have been sold. Everybody in Maine is familiar with the Memorandum Books from the World's Dispensary. To speak of each floor with its work and uses would make too long an article. Some idea of the magnitude of the business can be had when it is known that there are nearly three hundred persons employed in the two buildings. It is a proyen in the two buildings. It is a strong recommendation for any man or business to be popular at home. It is putting it mildly when it is said that the Institution is popular in Buffalo, and both it and its Chief bonored and loved by the inhabitants of the great Metropolis of the Lakes."
